

SQUARE POINT KNIFE

WITH ERGONOMIC, HEATER-COMPATIBLE HANDLE

- **No Product Contamination:**
Plastic handles with a cushion grip eliminate the potential for product contamination, which is possible with a wood handle.
- **Ergonomic:**
Softer, ergonomic cushion grip handle is more comfortable and easier to grip, reducing stress to your hands.
- **Handle Lasts Longer:**
Recommended for use with Everhard heaters, this knife's handle withstands heat better than a wood handle, increasing its useful life.

This knife can be used with Everhard knife heaters.
